

Material Datasheet

RUGBY® KILN DRIED SAND

CEMEX is a world leader in sales of packed cement and cementitious products, backed with technical expertise in their use. The Rugby® range of concretes, mortars and ancillary products provides the complete solution for most building and landscaping applications.

Rugby® Kiln Dried Sand is a natural, specially selected washed and dried sand designed for use as a jointing or grouting sand on block paving projects. It conforms to the gradings given in Annex D of BS 7533-3:2005.

Features / benefits / applications

- For use as jointing sand in all types of block paving work
- Use directly from the bag and brush into paving with a wide soft brush
- Typical coverage – 5m² of standard block paving

Coverage guide

One 25kg bag of Rugby® Kiln Dried Sand will cover approximately 5m² of standard block paving.

Storage Conditions

This product must be stored in unopened bags clear of the ground in dry conditions.

Health and safety

Avoid inhalation of any dust produced when working with Rugby® Kiln Dried Sand. Due to its dry nature it is recommended that if ever used indoors, a facemask should be worn to avoid inhaling any dust particles. Dry Sand can be abrasive on sensitive skins so it is recommended gloves be worn when handling the material.

Usage Guide

Do not use in wet or damp conditions

1. Once the Block Paving has been laid use directly from the bag and brush into block paving with a wide soft brush.
2. Ideally, make two or three passes with a mechanical plate vibrator. The Sand should be constantly brushed under the leading edge of the vibrator so that it is placed down between the blocks.

CEMEX UK Cement Ltd cannot be held responsible where workmanship has not been carried out in accordance with good practice.

Sustainability

As one of the UK's largest suppliers of building material solutions, CEMEX UK is committed to sustainable development across the business. The principle operations of our business are raw materials extraction, processing, distribution and re-cycling of building materials. CEMEX embraces the challenges of sustainable development, in striving to be socially, economically and environmentally responsible in everything we do to safeguard the needs of future generations. From a commercial perspective, a sustainable approach will allow CEMEX to continue as a preferred supplier to the industry, to drive further efficiencies and to ensure availability of long-term resources.

To deliver this promise CEMEX track the following indicators:

1. Reducing emissions
2. Improving efficiency of production and logistics
3. Developing innovative new products and services
4. Engaging employees
5. Increasing transparent dialogue with stakeholders
6. Measuring and controlling impacts
7. Contributing to sustainable communities
